GA 30⁺-90 (30-90 kW/40-125 hp)

Innovating for a sustainable future

At Atlas Copco, we have always looked ahead. Which products and services will make our customers more successful? Your future drives the Atlas Copco team every day. It is the reason why we devote so much time and so many resources to innovation. If there are technologies that will advance your productivity, we will find them. That is what we have been doing for almost 150 years now, setting new standards in compressed air reliability, efficiency, connectivity, and sustainability.

It's that last principle that now comes first. Sustainability is no longer something we should strive for, but something we must achieve. Productivity and growth will have to be built on sustainability. Atlas Copco – our products, our services, and our people – will help you get there, as we always have.

The technology that drives sustainability

Smart Temperature Control System

Calculates and achieves the ideal oil-injection temperature based on actual operating conditions to maximize efficiency.

Intelligent sensors

Constantly monitor the pressure drop and thus any energy losses in the inlet filter, the oil separator, and the oil filter (optional).

Energy recovery

Gives you additional energy savings by recovering and re-using up to 75% of the heat the compressor produces.

The ultimate smart solution, driven by efficiency

GA 37-90 Premium performance

- High-performance Free Air Delivery.Premium quality at the lowest initial
- investment.
- Integrated refrigerant dryer.
- Elektronikon[°] Touch controller (optional for GA 37/GA 45).
- **SMART**LINK real-time, remote monitoring and optimization.

Atlas Copco's GA and GA⁺ compressors bring you outstanding sustainability, reliability and performance, while minimizing your total cost of ownership. A choice of two premium fixed-speed compressor types provides you with the compressed air solution that perfectly matches your requirements with clear value propositions. Built to perform even in the harshest environments, the GA and GA⁺ keep your production running efficiently.

GA 30⁺-75⁺ Industry-leading efficiency

- Best-in-class Free Air Delivery.
- Lowest energy consumption for applications with a stable air demand.
- Intelligent features boost efficiency and reliability.
- Integrated refrigerant dryer.
- Elektronikon[®] Touch controller.
- **SMART**LINK real-time, remote monitoring and optimization.
- OPC UA available for production system integration.

GA 30+-75+: **Industry-leading efficiency**

Smart Thermostatic Control System (GA 55⁺/GA 75⁺)

- Intelligent algorithm achieves ideal injection temperature. Combines multiple operational parameters, including
- Increases compressor efficiency and reliability.

6

7

- and maintenance scheduling.
- performance and energy savings.

8

Our in-house developed Smart Temperature Control System introduces a new level of element efficiency and reliability. Its intelligent algorithm calculates the ideal oilinjection temperature based on parameters such as ambient and oil temperature, pressure and load, and air humidity. When necessary, the STC valve routes the oil via the coolers to achieve that ideal temperature to maximize compression efficiency and eliminate any risk of condensation.

The GA 30+-75+ is our fixed-speed oil-injected rotary screw compressor that sets the industry standard. It gives you more of the things that really matter: more energy savings, more air, and a longer lifetime. Its state-of-the-art compression element and a host of advanced features ensure maximum performance with best-in-class efficiency.

Maintenance-free drive system

- 100% maintenance-free; totally enclosed and protected against dirt and dust.
- No coupling or slippage losses.
- Standard up to 46°C/115°F; high ambient version 55°C/131°F.
- Works reliably in harsh environments.

2

IE4 Super Premium Efficiency motor

- IP55, insulation Class F, B rise.
- Non-drive side bearing greased for life.
- Designed for continuous operation in harsh environments.

Robust spin-on oil filter

- High-efficiency; removes 300% smaller particles than a conventional filter.
- Integrated bypass valve with the oil filter.
- 8000-hour service interval (GA 55⁺/GA 75⁺).

- Low element outlet temperatures ensure long oil lifetime.
- Removal of nearly 100% of condensate with integrated mechanical separator.

ambient temperature, pressure, humidity and load.

Intelligent sensors (GA 55⁺/GA 75⁺)

• Pressure drop sensors monitor the lifetime of the inlet filter, the oil separator, and the oil filter (optional). • SPM vibration sensor measures the vibration of the drive train

and sends real-time updates via SMARTLINK (option). • CAN-cables allow for easy updates.

Elektronikon[®] Touch for remote monitoring

High-tech controller with warning indications, compressor shut-down

• Standard **SMART**LINK remote monitoring to maximize air system

• Optional multiple compressor control (2, 4 or 6 compressors).

Heavy-duty air intake filter

• Protects compressor components by removing 99.9% of dirt particles down to 3 microns. • Long, 8000-hour lifetime (GA 55+/GA 75+).

GA 55⁺/GA 75⁺ exclusive: Smart Temperature Control System

GA 37-90: **Premium performance**

The GA 37-90 gives you that trusted Atlas Copco oil-injected screw performance at a low investment cost. Built with top-quality materials, the GA 37-90 ensures compressed air reliability and efficiency in the toughest conditions.

Maintenance-free drive system

- 100% maintenance-free; totally enclosed and protected against dirt and dust.
- Suitable for harsh environments.
- No coupling or slippage losses.
- Standard up to 46°C/115°F; high ambient version 55°C/131°F.

2 **IE3 Premium Efficiency electrical** motor

- IP55, insulation Class F, B rise.
- Non-drive side bearing greased for life.
- Oil-lubricated drive side bearings.
- Designed for continuous operation in harsh environments.

- Silent operation.
- High flows.
- Compact design.

3 Robust spin-on oil filter

- High-efficiency; removes 300% smaller particles than a conventional filter.
- Integrated bypass valve with the oil filter.

5

4

6

- Low noise fan

Separate oversized oil cooler and aftercooler

• Low element outlet temperatures ensure long oil lifetime.

- Removal of nearly 100% of condensate with integrated
- mechanical separator.
- No consumables.
- Eliminates possibility of thermal shocks in coolers.

Advanced Elektronikon[°] Touch control & monitoring (optional for GA 37/GA 45)

• Integrated smart algorithms reduce system pressure and energy consumption.

• Monitoring features include warning indications, maintenance scheduling, and online visualization of machine conditions.

• Standard SMARTLINK remote monitoring to maximize air system performance and energy savings.

Heavy-duty air intake filter

• Protects the compressor components by removing 99.9% of dirt particles down to 3 microns.

• Differential inlet pressure for proactive maintenance while minimizing pressure drop.

As connected as you will be

When it comes to connectivity, manufacturing equipment has long stayed behind. Not Atlas Copco. Our compressed air systems helped pave the way for Industry 4.0. We never stopped developing innovative features and introducing new options to help our customers meet their operational goals.

SMARTLINK

- Real-time monitoring of your compressor's operational parameters on your computer or mobile device.
- Performance data and insights identify opportunities for optimization.
- Service timeline.
- Maintenance and service alerts.
- Online resource center with manuals, documentation and technical information.

Control

Elektronikon[°] Touch (optional for GA 37/GA 45)

The Elektronikon[®] Touch features a 4.3-inch user-friendly, multilingual display with clear pictograms and a service indicator. The operating system offers a host of control and monitoring options and smart algorithms to optimize your compressor performance. Customized timers and efficiency controls are just a few examples.

Optimize

Atlas Copco

OPC UA

Atlas Copco was the first compressor manufacturer to offer OPC UA, the machine-to-machine communication protocol that was developed especially for industrial automation. That means you can integrate your Atlas Copco compressor seamlessly in your production network:

Manage

Equalizer 4.0

- Reduced pressure band: Create a narrow, predefined pressure band to save energy.
- Optimal system performance: Program all compressors to have equal running hours to reduce service intervals.
- Improve reliability and efficiency: With actionable performance reports, service warnings, and energy efficiency data.
- network.

Manage multiple compressors with the Equalizer 4.0 (integrated in your compressor or as a standalone unit):

• Multiple compressor control: Manage up to 6 compressors in one air

- Standardization of production equipment communication.
- Insight into production system performance and optimization options.
- Network security thanks to various encryption levels, authentication, auditing, and user control to ensure security.

Built-in quality air

Untreated compressed air contains moisture, aerosols and dirt particles that can damage your air system and contaminate your end product, creating the risk of corrosion and leaks. Maintenance and repair expenses can far exceed air treatment costs. An air dryer is therefore essential to protect your systems and processes. The GA and GA⁺ have an integrated dryer option to ensure your peace of mind.

A fully integrated dryer

- Optimized sizing for the compressor avoids excessive energy consumption.
- Fit for your application.
- Controlled and monitored by the Elektronikon[°].
- Space-saving all-in-one solution with low installation costs.

Lowest lifecycle costs and peace of mind

- No extra installation costs.
- Save on floor space.
- Use of energy-efficient, environmentally friendly refrigerant R410A reduces operating costs and ensures zero ozone depletion.
- Heat exchanger cross-flow technology with low pressure drop, saving energy and costs.
- Zero waste of compressed air thanks to no-loss condensate drain.
- Advanced control functions ensure dry air under all circumstances and prevent freezing at low load.
- Pressure dewpoint of 3°C/37°F (100% relative humidity at 20°C/68°F).

Integrated purity

The optional UD⁺ filter and integrated refrigerant air dryer (IFD) efficiently remove moisture, aerosols and dirt particles to protect your investment. The UD⁺ filter has a 40% lower pressure drop than the conventional DD⁺/PD⁺ filter combination. It saves space and reduces energy costs. Using only 1 single filter it is possible to reach Quality Class 1.4.2 according to ISO 8573-1:2010.

| | ISO QUALITY CLASS* | DIRT PARTICLE SIZE | WATER PRESSURE DEWPOINT** | OIL CONCENTRATION |
|------------------------------|--------------------|--------------------|------------------------------|-------------------|
| Pack compressor | 34 | 5 microns | - | 3 ppm |
| Integrated refrigerant dryer | 3.4.4 | 5 microns | +3°C/37°F | 3 ppm |
| DD+ | 2.4.2 | 1 micron | +3°C/37°F | 0.1 ppm |
| UD+ | 1.4.2 | 0.5 micron | +3°C/37°F | 0.1 ppm |

* The table values reflect the maximum limits according to the ISO quality air standard (ISO 8573-1:2010). ** Water pressure dewpoint based on 100% RH at 20°C/68°F.

Built-in energy recovery

As much as 90% of the electrical energy used by a compressed air system is converted into heat. Why let that heat go to waste? A specifically developed energy recovery system can be built into your GA and GA⁺, allowing you to recover up to 75% of that power input as hot air or hot water (e.g.: changing room showers). Through efficient use of the recovered energy, you generate important energy cost savings and a high return on investment without compromising your compressor's performance.

Use your compressor twice

Hot water

Convert compressor heat into hot water for:

Radiators

- Laundries, industrial cleaning and sanitary facilities
- Industrial process heating
- Canteens and large kitchens
- Food, chemical and pharmaceutical industries

Ducting

Recovered hot air can be used for:

- Auxiliary or main heating of warehouses and workshops
- Drying processes

Options

Some applications may need or may benefit from additional options and more refined control/air treatment systems. To meet these needs, Atlas Copco has developed options and easily integrated compatible equipment.

 ** A-weighted emission sound pressure level at the work station, Lp WSA (re 20 μ Pa) dB (with uncertainty 3 dB). Values determined according to noise level test code ISO 2151 and noise measurement standard ISO 9614.

Dimensions

- 7.5 bar versions at 7 bar - 8.5 bar versions at 8 bar
 - 10.5 bar versions at 10 bar
 - 13 bar versions at 12.5 bar

Reference conditions:

- Absolute inlet pressure 1 bar (14.5 psi) - Intake air temperature 20°C/68°F

FAD is measured at the following working pressures:

Pressure dewpoint of integrated refrigerant dryer at reference conditions: 3°C/37°F

*Unit performance measured according to ISO 1217, Annex C, Edition 4:2009. ^{**} A-weighted emission sound pressure level at the work station, Lp WSA (re 20 μPa) dB (with uncertainty 3 dB). Values determined according to noise level test code ISO 2151 and noise measurement standard ISO 9614.

FAD is measured at the following working pressures:

- 7.5 bar versions at 7 bar
- 8.5 bar versions at 8 bar
- 10.5 bar versions at 10 bar
- 13 bar versions at 12.5 bar

Reference conditions:

- Absolute inlet pressure 1 bar (14.5 psi)
- Intake air temperature 20°C/68°F

Pressure dewpoint of integrated refrigerant dryer at reference conditions: 3°C/37°F
